

A Greeting to the 2016 BEST students.

BEST Robotics students, many hubs are kicking off or will be kicking off soon. This may seem like a stuffy greeting from an old stuffy engineer, and maybe it is. But you are embarking on an adventure that is anything but stuffy and I dare say is more exciting than anything you have ever done. It will be fast, it will be furious, and it will be fun. It requires you to think, to problem solve, and to, most of all, be creative. You are part of a team, make everything you do an outstanding effort and your team will be an outstanding team, a BEST team.

Ted Mahler
