2022 Autonomous Programming Spring Challenge
Privacy Statement

The only information collected during registration for this challenge is a valid email address to be used for contact purposes only. A parent email can be used to avoid sharing any student private information.

Students that participated on a BEST team in 2021 will be associated with that team (for team awards) through their assigned Team Number; this is the number assigned to your BEST team (school) during the 2021 season. Since all participating students registered for the 2021 season, their demographic information and association with a (school) has already been captured. No new information will be collected.

Students that did not participate on a BEST team in 2021 are still able to participate in this challenge, independent of a school/team. No personal information will be collected except for the registration email (for contact purposes only) and information about the school they attend. These students will be associated with a school (for team awards) based on the information they provided during registration.

Students can participate for both individual and team awards.

Only adults (teachers, mentors, parents) should request the software license from Mathworks for the software required for the challenge. Access to the software (either the downloaded PC version or the online version) DOES require a free account to be created at www.mathworks.com. The email address used for such account creation is not required to be a student email. The email address associated with the account used by the student is left up to the teacher, mentor, parent.

The BEST National Registry Security Policy further details the privacy controls in place using our system.
