WOLFRAM

September 2023

Dear BEST Students and Coaches,

Wolfram Research is pleased to help support BEST Robotics by offering you a free year of the following resources:

1.) WolframOne
2.) Wolfram SystemModeler
3.) WolframAlpha Pro

As the creators of Mathematica, Wolfram|Alpha, and the Wolfram plugin for ChatGPT, Wolfram Research is the pioneer of computational intelligence and scientific innovation. Wolfram Language powers intelligent assistants, AI systems, and tools for R&D, education, enterprise and consumer applications. In addition to providing software for more than a generation of scientists and students, Wolfram maintains some of the web's most visited sites for technical information, including the Wolfram Demonstrations Project and Wolfram Community - an online forum for sharing ideas, asking questions, and collaborating with professionals, researchers, and other students across disciplines.

To request your complimentary Wolfram technology, complete the webform here:https://www.wolfram.com/sponsorshiporderform/

Students, please use **BESTSTUW1SYPR2023** as the Program Code in the form.
Coaches, please use **BESTCOACHW1SYPR2023** as the Program Code in the form.

These resources are non-transferrable and may only be used by BEST Robotics participants. This offer expires on May 31st 2024 and requests for this tech will not be honored beyond that date.

The Wolfram High School Summer Research Program is held annually near Boston Massachusetts. Applicants should be interested in programming, advanced math, scientific research, and creating and publishing a project. Scholarships are available. International students are welcome. Past projects may be viewed here: https://www.wolframcloud.com/obj/microsites/summercamp/projects.html.

To be notified of application announcements please join the mailing list on: https://education.wolfram.com/summer-research-high-school/

Sincerely,

Carol Cronin
