

## BEST National Registry

Dear Participant,

Thank you so much for deciding to participate in the 2018 BEST Robotics game, Current Events! We are excited for you to join us in this competition. This year, BEST is implementing a new National Registry. This requires all teachers, students, and mentors to go to the link below and register right after kickoff. Please, before registering, make sure you know your Hub name and four-digit team number. This information must be accurate to register successfully. Please use all four digits of your assigned team number (e.g., 0230) when registering.

<http://bestnationalregistry.eventbrite.com>

Each team member must be registered whether they do it individually or they are registered by someone else (e.g. a teacher). Anyone can register multiple individuals but be aware that there is some personal info that is needed to register an individual like age, email address, company (for mentors), etc. Due to such personal information (such as email address), we request that any student under age 13 have their parents register for the student.

Document proof within your Engineering Notebook that your team members (teachers, students, mentors) have all been registered in the national registry and earn additional points on your score sheet.

You can verify your registrations at <http://www.bestinc.org/viewregistry>  
Thank you for participating. We cannot wait to see you on game day!

Sincerely,

BEST Robotics
