

# Simulink for BEST Robotics 2014

MathWorks is excited to offer complimentary Simulink software to all the BEST teams. Use Simulink and the VEX Microcontroller Support Package to program your robot!

To learn more about how to request software for your team, go to: [www.mathworks.com/BESTInstall](http://www.mathworks.com/BESTInstall). After you submit your software request, you will receive your installation keys and instructions in 72 business hours.

NOTE: Ensure that you have a connection to the Internet and administrator permissions on the computer at the time of installation. Contact your teacher/mentor if you need help. Software products provided to teams for this competition may be installed and used only to support participation in the sponsored student competition.

## What's happening with Simulink in 2014

**Online download and installation of the Simulink and VEX Support Package.** (DVD's are no longer needed).

**Built-in Compile and Download capability.** Separate installation of a 3rd party compiler is no longer required. The new compiler is available throughout the year and you can use Simulink

**Mac OS support added.** This new support enables your team to create Simulink models and download to a robot from both Windows and Mac machines.

**New documentation and demos/tutorials** in the VEX Support Package.

**BEST Simulink Design Award**
