Is your team interested in using the Real-Time Leaderboard data?

Join the *beta* test for our new data sharing project. Teams can access real-time matches and scores from their local hub through the new BEST Public API. Teams can use the data on Game Day to enhance their websites, team exhibits, apps and more.

Interested teams should visit http://bit.ly/BESTAPI (case matters) to sign up. Registration is free and will provide your team with documentation and an access token. Example projects are also available for the Raspberry Pi and C# in Visual Studio.

For questions, please contact us at leaderboard@bestinc.org.

Good luck on Game Day!
